

# **Applications of Reverse Genetics**

3 February 2006 – Birkbeck College, London

## **Agenda**

- 9:15 – 9:45**      **Registration – Tea, coffee and biscuits**
- 9:45 - 10:00      **Introduction by the Chair**  
Dr M. Baron, Institute for Animal Health, Pirbright
- 10:00 - 10:30      **Reverse genetics of pneumoviruses**  
Professor Andrew Easton - University of Warwick
- 10:30 – 11:00      **The development and application of flavivirus reverse genetic systems**  
Dr Andrew Davison - University of Bristol
- 11:00 – 11:30      **Morning tea/coffee**
- 11:30 – 12:00      **Recombinant Sendai virus as gene transfer agent**  
Dr Uta Griesenbach - Imperial College London
- 12:00 – 12:30      **Preparing for the inevitable – pandemic influenza**  
Dr James Robertson - National Institute for Biological Standards and Control, Potters Bar
- 12:30 - 13:30**      **Lunch in the exhibition hall**
- 13:30 – 14:00      **Manipulation of virus genomes to elucidate the pathogenesis of respiratory syncytial viruses**  
Dr Geraldine Taylor - Institute for Animal Health, Compton
- 14:00 - 14:30      **Rational attenuation of a morbillivirus**  
Dr Paul Duprex - The Queen's University of Belfast
- 14:30 – 15:00      **General discussion & close**
