

Advances in Endothelial Cell Isolation and Culture

March 19th 2004

Agenda

Morning

- 10:30 – 11:00 **Registration – Tea, coffee and biscuits**
- 11:00 – 11:30 **Introduction by the Chair**
Charlotte Lawson
- 11:30 – 12:10 **Isolation and culture of primary mouse endothelial cells**
Elaine Lidington
Hammersmith Hospital
- 12:10 – 1:30 **Lunch**

Afternoon

- 1:30 – 2:15 **New flow based coculture models to investigate the regulation of leukocyte recruitment to EC by cells of the stromal environment**
Ed Rainger
The University of Birmingham
- 2:15 – 2:55 **BD BioCoat™ Solutions for Angiogenesis Cell Culture Assays**
Matthias Beckmann
BD Biosciences
- 2:55 - 3:30 **Afternoon Tea/Coffee and cakes with the companies**
- 3:30 – 4:00 **Isolation and culture of liver sinusoidal endothelial cells and their use for the investigation of the role of VAP-1 in the liver**
Trish Lalor
The University of Birmingham
- 4:00 - 4:30 **The role of endoglin in endothelial cells**
Helen Arthur
University of Newcastle upon Tyne
- 4:30 **Close**
